Re: Notice of Ex Parte – WC Docket No. 13-184
New Hope Technology Foundation

Dear Ms. Dortch:

On May 6, 2014, John Hughes III, President, and John Hughes IV, Vice President, of New Hope Technology Foundation (“New Hope”); Ray Spain, Superintendent, Warren County Schools, North Carolina; and Daniel Vogelmann, Assistant Superintendent, Accountability & Technology, Wilson County Schools, North Carolina (Superintendents); along with Paul Besozzi and Koyulyn Miller of Patton Boggs LLP, counsel to New Hope, met with Commissioner Clyburn; Rebekah Goodheart, legal advisor to Commissioner Clyburn; and Stefanie Frank, intern to Commissioner Clyburn, at the Federal Communications Commission (FCC), to discuss the matters raised in the Commission’s E-Rate reform proceeding.¹

During the meeting, the New Hope representatives and the Superintendents discussed the importance of E-rate reform, expressing in particular concerns regarding: (1) the potential negative impact of eliminating support for legacy voice services, including cellular and Voice over Internet Protocol (“VoIP”); (2) the importance of predictable, focused funding for broadband deployment inside the schools; and (3) the need for permanent expansion of the fund to meet these important growing needs.

First, New Hope and the Superintendents explained that if support for cellular and VoIP, which are ongoing necessary services, were reduced or eliminated, the ability of the school districts to match funds for other services would be affected, or other cost reductions (e.g., staff) would have to be made. Therefore, retention of—at a minimum—cellular and VoIP was essential.

Second, New Hope and the Superintendents described the difficulties in planning and approving annual budgets without knowing with certainty the timing or level of funding support. Specific reference was made to the impact of the lack of support for internal connections for a

number of recent years. In particular, the lack of any Priority 2 funding for Funding Year ("FY") 2013 and likely FY 2014 was cited.

Third, New Hope and the Superintendents stressed the fact that to effectively meet the growing demands for broadband deployment in the schools the size of fund must be permanently increased. By way of example, they noted the prospect of adjusting the fund for inflation going back to 1998 or shifting funds from other USF programs (e.g., Lifeline).

Both New Hope and the Superintendents urged that this input from, and on behalf of, school district managers living with the E-Rate Program on a daily basis be given strong consideration.

Respectfully submitted,

Paul Besozzi
